

Safety Perks for Classic Coffee Originals

Features and Benefits

Less damage and repairs, easy to install, and saved money on maintenance and installation.

Industry Group: MHI INDUSTRY GROUP

“I was trying to achieve a safer environment for the forklift truck drivers through visual safeguards and my biggest issue was excessive damage due to forklift impact.”

Column Protector

The growing appeal of A-SAFE products within the food and beverage industry has been highlighted by a recent installation at U.S beverage experts, Eight O’Clock Coffee.

The four day warehouse installation in Hyattsville, MD (ten miles outside Washington, DC) looked to address maintenance costs on internal structures caused by forklift truck impacts, as well as providing employees, pedestrians and vehicle drivers with an all-round safer working environment.

Eight O’Clock Coffee is an original U.S. brand, established since the mid-nineteenth century and is well-known in American households. It is a subsidiary of Tata Global Beverages Ltd, which include Tetley Tea, Good Earth Teas, JEMČA and Tata Tea – the biggest-selling tea brand in India
