“With Schneider Electric solutions in place, Bolloré Logistics is empowered to expand, innovate and make the best decisions with continuous, measurable energy savings and increased reliability.”
Nathalie Leger
Head of Bolloré Logistics, Singapore.

*Bolloré Logistics
Global leader in international logistics and freight forwarding*

Customer Challenge

- Current system did not collect and organize any in-depth energy consumption data and present it into energy saving analytics.
- Needed a solution that can help with better decision making and to communicate to stakeholders and customer results.

The Solution

- Powertag
- EcoStruxure™ Power Monitoring Expert
- EcoStruxure™ EcoStruxure Power Advisor

Customer Benefits

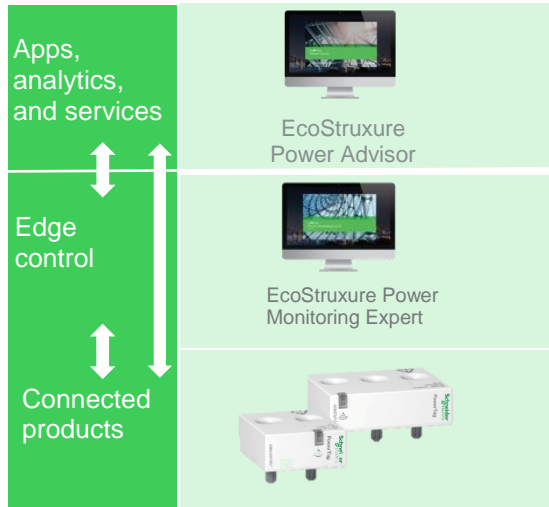

- More efficient use of resources and improved financial performance
- Increased capability to deliver consistent and improved services and products, thereby increasing value to customers and all other stakeholders.
- Ease of renewal of Green Mark Certification

The Results

An estimated 10% decrease in our energy consumption and this is a significant reduction in our carbon footprint.

AT THE FOREFRONT OF INNOVATION

Transport and Logistics solutions
for a fast-changing world
