

**Matt Weinberg**

Demand Planner  
Nestle-USA

Matt Weinberg carries a Bachelor's of Science degree in Business Administration with a Concentration in Supply Chain Management and a Minor in Quality Management from the University of Wisconsin Stout.

Mr. Weinberg moved to California 4 years ago to work at Nestlé's USA Headquarters in Glendale California. He has 3 years of professional experience in physical logistics, master production scheduling, and most recently demand planning.

Mr. Weinberg's expertise include: demand planning, master production scheduling, lean enterprise, Six Sigma, value stream mapping, consumer value mapping, capacity management and forecasting, supply chain implementation, food manufacturing, network optimization, trade net-working capital management, and inventory management. He also has significant experience when it comes to factory planning and capacity management.

During his previous role with Nestle he implemented a companywide capacity management standard that is focused on increasing the horizon of Nestlé's Capacity Management. Mr. Weinberg has been actively engaged with multiple parts of Nestlé's supply chain industry since his career began.

Mr. Weinberg continues expanding his Supply Chain knowledge by becoming a board member on the CSC-MP LA Chapter and working towards his CPIM Certification. Currently he holds a Six Sigma Green Belt and a certification in the first module of APICS. His mission is to continue to expand his supply chain knowledge and increase his impact to the industry.
