

# PAPERplus® Papillon

Storopack's PAPERplus® Papillon transforms two 8" wide layers of paper into versatile protective pads perfect for small and medium-sized parcels.

These pads can fit into small areas and can be snuggled between products to ensure good protection and avoid rattling during shipping.

**NEW!**  
FROM  
STOROPACK

## A New Top Fill Process Solution from Storopack.

- PAPERplus® Papillon is extremely versatile with a small footprint
- The machine offers three different operating modes: automatic, on-demand and foot controlled
- Multiple positions of the machine allow for easy integration
- The machine's maximum speed is 130'/min.
- PAPERplus® Papillon pads can be used for filling voids or for wrapping
- The paper pads offer a good "spring effect"

# Quickly and Neatly Protect Small and Medium-Sized Parcels

## The Machine

The PAPERplus® Papillon machine is extremely versatile and features three different operating modes: Automatic, On-Demand and Foot. Multiple positions allow for easy integration into existing Top Fill packaging processes: Floor and Table Top. The machine will generally be used as a “stand-alone” unit, but it can also be used in conjunction with silo and conveying systems to serve multiple packing stations.

- Lightweight enough to be carried by hand
- Small footprint easily integrates into packing stations
- Dispenses pads directly into the carton for increased productivity and Working Comfort®
- Plug and play functionality makes it exceptionally user-friendly

## The Paper

The lightweight PAPERplus® Papillon pads are a unique patented shape with a “spring like” effect. This feature lets the pads adjust to shape of the products in the package ensuring reliable protection. The pads are easily and neatly removed from the carton providing a pleasant unboxing experience to the end-customer.

13" (L) x 13" (W) x 15" (H)

33 lbs. (without paper)

Maximum Speed 130'/minute

110 or 230 V

50/60 Hz.
