Solving Material Handling Challenges  
With Unique Automated Solutions

Innovative solutions are required to meet an endless variety of unique needs. That's what Daifuku is about. Founded in 1937, our 70 years of experience in material handling for a variety of industries gives us the knowledge, tools, and capability to tailor a solution to meet your unique material handling challenge.

Daifuku America, the North American affiliate for Daifuku Co., Ltd., provides automated storage and retrieval systems, conveyor and sortation systems, and warehouse management/control software solutions to help manufacturers, warehouses and distribution centers:

• Reduce Errors  • Decrease Cycle Time
• Streamline Processes  • Improve Productivity

Industry Applications

Daifuku's automated systems are operating and supporting manufacturing and distribution facilities of all sizes, in a variety of industries, including:

• Apparel
• Automotive
• Beauty Aids & Cosmetics
• Book & Publication Distribution
• Electronic Components
• Flat Panel Displays
• Food & Beverage
• Household Appliances
• Libraries
• Transportation Vehicles & Parts
• Office & Computer Equipment
• Pharmaceuticals & Health Care
• Refrigerated & Freezer Applications
• Retail
• Semiconductor Fabrication
• Textiles
• Toys & Athletic Goods
• Warehouse & Storage Facilities
How We Are Different

Our strength is our ability to provide customers with a complete and unique solution.

We don’t try to make one solution be the answer to all problems, instead, we listen and then use our blend of engineering and material handling products to develop a solution that allows your company to meet your business needs now and in the future.

To ensure the highest quality standards and performance, we design and manufacture the majority of our products including:

- Automated Storage & Retrieval Systems (AS/RS)
- Conveyance & Sortation Products
- Automated Vehicles
- Warehouse Control Software (WCS)
- Warehouse Management Software (WMS)
- Logistics Studies & Engineered System Design
- Project Integration & Management

The benefit to customers is faster operation, optimized storage density, improved working environments and greater productivity, plus increased order and inventory accuracy.

We form a partnership with our customers and are committed to assisting them from concept and design to production and through installation.

Areas of Expertise

With over 20,000 global installations, no company is more experienced than Daifuku at engineering high-performance automated material handling and warehouse management systems, specifically designed to meet and overcome any challenge.

Daifuku America is comprised of three specialized business units to serve your exacting needs:

**Automobile Factory Automation**

Flexible conveying systems used by Toyota, Honda, Nissan, Subaru, Isuzu, Mazda, General Motors, Ford, and Daimler-Chrysler

**Factory & Distribution Automation**

Automated storage, buffering, sortation & conveyance solutions, and logistical operations analysis for companies of various sizes and industries

**Electronics Factory Automation**

Automated storage & transportation equipment for clean-room semiconductor, flat-panel plasma & LCD fabrication industries

---

**Daifuku’s Legacy of Firsts**

1966 | Installed Japan’s first AS/RS

1969 | Developed the world’s first computer-controlled AS/RS

1972 | Designed the first standard, pre-engineered AS/RS package

2006 | Engineered the first two-crane synchronized AS/RS

---

**Global Locations**

Daifuku is one of the largest manufacturers of material handling systems in the world. With over 40 offices and factories in more than 16 countries, our global presence and installation base are major strengths:

- Daifuku America
- Daifuku Canada
- Daifuku China
- Daifuku Europe
- Daifuku India
- Daifuku Japan
- Daifuku Korea
- Daifuku Malaysia
- Daifuku Singapore
- Daifuku Taiwan
- Daifuku Thailand
