

Engineering Convenience: Western Pacific Develops Innovative Storage Space On Behalf of Popular Beverage Manufacturer

Original Shelving Solution Boosts Security and Productivity

Los Angeles, December 2013 – Western Pacific Storage Solutions (www.WPSS.com) recently partnered with experts from California-based MTM Business Systems to spearhead a warehouse space redesign for a well-known manufacturer of globally popular energy drinks.

The manufacturer was experiencing a range of problems at one North American location where various corporate assets: IT and HR records, finance and consumer affairs data, videos, proprietary marketing materials, tapes of commercials, and branded items for high-profile sports events were being stored. Issues included incidents of theft by employees, and problematic access to inventory which was impeding workflow.

In addition to optimizing the storage of promotional 'swag' and sensitive archival materials, the company needed a solution flexible enough to meet current needs, yet accommodate inevitable future growth. So when MTM specialists needed an engineering, installation, and fabrication partner for the project, they turned to Western Pacific Storage Solutions.

MTM Business Systems is a national company specializing in high density compact mobile shelving filing storage systems, automated storage and retrieval systems, shelving systems, multi-media storage systems, mail room

equipment, weapons racks and other storage products for offices and warehouses.

Scott Moll, long-time sales manager at MTM stated, “We turned to Western Pacific because of their reliability, range of storage products, and committed follow-through”.

MTM and Western Pacific created inward-facing rows of shelving, and design engineers added back, and side panels to create individual 'departmental' cages with individual key-locking doors. Each cage is keyed differently, and doors swing outward to maximize usable space. Theft is deterred, and access to inventory is optimized.

Western Pacific's Pacific shelving with compression clips was selected for the project. The clips provide bolt-free assembly, and facilitate easy shelving adjustments. Pacific shelving can be easily fitted with additional bracing for seismic applications.

MTM obtained permitting for a second level, and together MTM and Western Pacific designed the structure for another level to be added in the future. Now theft problems are a thing of the past, and the beverage manufacturer can grow their inventory 'up' not 'out.'

Tom Rogers, CEO of Western Pacific, shared, “Working with MTM to bring security to this beverage manufacturer had a successful outcome because they are true storage professionals and co-creating solutions was a win-win for all.

ABOUT WPSS: Over the past twenty years, Western Pacific Storage Solutions (www.WPSS.com) has been serving the smartest links in the supply chain. They have experienced steady growth as a trusted supplier of industrial shelving and work platforms (mezzanines) to some of the world's largest corporations. The company's national operations in California, Texas, and Kentucky, include manufacturing plants, and three well-stocked distribution centers.
