## ASSEMBLY FLOOR WORK PLATFORMS

A First Tier Supplier to an internationally renowned manufacturer of industrial engines commissioned EGA to design and build a customized Assembly Floor Work Platform that could surround engines under assembly. The engines are over eight feet tall and 12 feet long, thus requiring elevated access.

EGA engineers designed a platform that closely accommodates protrusions in the overall shape of the engine, thus maximizing worker access and proximity to it. The platform can also be easily moved from engine to engine under assembly without having to be dismantled. Platforms are quickly and easily secured together to ensure continuity of platform sections. Heavy duty construction accommodates over 1000 pounds, making the platform stable for multiple workers. As well, the multi-sectional configuration with dual ladders allows for easy ingress, egress, and movement on the platform.

### If We Can Do This For Them, What Might We Do For You?

Rely on EGA precision engineering and manufacturing expertise to design and build custom racks like these, and other equipment that will meet the specific people-access, materials-handling, or storage needs of your industry and its processes—no matter how simple or complex your requirements.

[LEARN MORE](#)

**The custom EGA Assembly Floor Work Platform also features:**

- ▶ Slip-resistant grip strut deck
- ▶ Tool trays
- ▶ Integral shelving and storage for parts

**EGA Assembly Floor Work Platforms are available with stainless steel construction or offered in a variety of finishes, including:**

- ▶ Painted enamel
- ▶ Powder coat
- ▶ Hot-dipped galvanized
- ▶ And more

**Typical industrial applications:**  
manufactured goods, metalworking
