## PERSON-ABOARD ORDER PICKING MODULES

EGA Products designed and manufactured these Person-Aboard Order Picking Modules for the U.S. Department of Defense (DOD) for use at their warehouse locations, doing so in cooperation with one of America's premier materials-handling equipment manufacturers.

Effectively a shopping cart with 3-dimensional access, these modules increase the efficiency of DOD staging and packaging operations by enabling man-aboard forklift operators to pick many more items per hour than they could with single-level conventional pallets.

### If We Can Do This For Them, What Might We Do For You?

Rely on EGA precision engineering and manufacturing expertise to design and build custom racks like these, and other equipment that will meet the specific people-access, materials-handling, or storage needs of your industry and its processes—no matter how simple or complex your requirements.

[LEARN MORE](#)

**Special features of the EGA Person-Aboard Order Picking Modules designed for the DOD include:**

- Sides, tops, and lockable double doors constructed of expanded metal grid work to secure ordnance and other sensitive military materiel while leaving it easily visible to the operator.
- Adjustable flat or inclined shelving levels-allow for flexibility and better segregation of items.
- Expanded metal grid work-provides necessary ventilation.
- Heavy-duty swivel casters-make it easy to position the module and connect it to the forklift.

- Push handles-allow for easy movement on the ground.
- Clamp blocks and other attachments-easily secure the module for unloading and other operations.

**EGA Person-Aboard Order Picking Modules are available with stainless steel construction and are otherwise offered in a variety of finishes, including:**

- Painted enamel
- Powder coat
- Hot-dipped galvanized
- And more

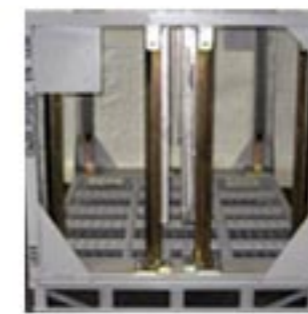

**Typical industrial applications:**  
automotive, manufactured goods, military/government, shipping
