PORTABLE STORAGE MODULES

EGA Products designed and manufactured 14 versions of these Portable Storage Modules for one of America's leading manufacturers of household cabinets and cabinetry components—over one thousand units in all. Each is precisely constructed to interface with the company's existing fleet of Automated Guided Vehicles (AGV) as well as with its Automated Storage & Retrieval System (ASRS).

Working cooperatively with the company's internal project team, EGA designers and manufacturing experts engineered a system of portable storage modules that accommodates the various sizes and configurations of cabinet components that travel through the plant daily, while at the same time reliably interfacing with the existing AGV and ASRS technologies.

If We Can Do This For Them, What Might We Do For You?

Rely on EGA precision engineering and manufacturing expertise to design and build custom racks like these, and other equipment that will meet the specific people-access, materials-handling, or storage needs of your industry and its processes—no matter how simple or complex your requirements.

[LEARN MORE](#)

Among other custom features, these EGA Portable Storage Modules have:

- ▶ Powder-coated wire dividers to protect cabinet finishes from marks and scratches
- ▶ Corrugated polycarbonate sides for lighter weight with superior durability
- ▶ Push handles for easy movement and positioning independent of the AGS and ASRS

Typical industrial applications:

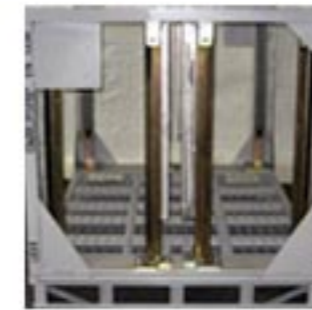

Typical industrial applications: automotive, manufactured goods, military/government

Carousel Racks

Shipping & Receiving Packaging Benches

Indexing Tower Racks

Custom Operations Platforms

Returnable Equipment Racks (Non-Collapsing)
