Manufacturers of Material Handling and Storage Equipment

CUSTOM FABRICATION

**PERFORMANCE  
BY DESIGN**

## RETURNABLE EQUIPMENT RACKS (NON-COLLAPSING)

Custom designed and manufactured for brand leaders in the international HVAC market, these Returnable Equipment Racks transport delicate fan blades from building to building or point-to-point within a manufacturing environment.

Each features a unique arm & hook system that can nest two rows of 20 proprietary blades for a total capacity of 40 units - without tie downs or any waste-producing packaging. The open design leaves parts easily assessable to assemblers.

### If We Can Do This For Them, What Might We Do For You?

Rely on EGA precision engineering and manufacturing expertise to design and build custom racks like these, and other equipment that will meet the specific people-access, materials-handling, or storage needs of your industry and its processes—no matter how simple or complex your requirements.
