

*"We don't just make better mezzanine floors... We make mezzanine floors better."*

ResinDek<sup>®</sup> mezzanine panel products have been engineered and developed for the material handling industry:

- Support foot traffic and pallet jack live and dead loads up to 8,000 lbs.
- Superior stain and scratch resistance
- Certified static control for electrically sensitive environments (ESD)
- Finishes for superior clean-ability and showcase appearance
- Specially designed tongue and groove to promote effective panel to panel wheel load transfers

All ResinDek panels are composed of wood fibers, various resins, and proprietary

coatings of your choice for protection, durability, and showroom appearance with a 10-year warranty.

### ResinDek<sup>®</sup> Finishes

Gray Diamond Seal 2<sup>™</sup> finishes:

- Outperform other products in withstanding gouge and taber abrasion tests
- Has exceptional resistance to common stains and has been tested in accordance with NEMA LD 3.4 with 29 different reagents

- Is more skid-resistant than other floor panels (coefficient of friction test data available upon request)
- Gray Diamond Seal 2<sup>™</sup> and ESD are standard finishes. Clear Diamond Seal 2<sup>™</sup> is available in truckload quantities

### ResinDek<sup>®</sup> ESD Finish

ResinDek ESD panels with our Electro-Static Dissipative Finish provide an outstanding static control solution for mezzanine floors, shelving systems and workstations.

- Protect electrically sensitive devices, such as laptops, barcode scanners, servo-drive motors, and pick-to-light systems that are common in distribution centers
- Eliminate expensive computer down-time caused by electrical static discharges
- Prevent uncomfortable static shocks to employees with a grounded surface. ResinDek ESD panels have been extensively tested by the testing firm of Stephen Halperin & Associates and have been found to be in compliance with the ESD Association Specifications on back.

## ResinDek<sup>®</sup> Mezzanine Floor Panels

Product Name	Live Dead Pallet Jack Limits	Thickness	Finishes Available		
			Unfinished	GDS2	ESD
ResinDek <sup>®</sup> LD <sub>50</sub>	up to 2,300 lbs.	1/2"	■	■	■
ResinDek <sup>®</sup> LD	up to 2,500 lbs.	3/4"	■	■	■
ResinDek <sup>®</sup> MD	up to 3,500 lbs.	3/4"	n/a	■	■
ResinDek <sup>®</sup> HD	up to 4,500 lbs.	3/4"	n/a	■	■
ResinDek <sup>®</sup> MAX	up to 8,000 lbs.	1-1/2"	n/a	■	■
ResinDek <sup>®</sup> Xspan <sup>®</sup>	up to 3,000 lbs. no corrugated required	1-1/8"	n/a	■	■

#### Finishes Available

Gray Diamond Seal 2<sup>™</sup>  
ESD Certified Static Control

#### Options

Invisi-Loc<sup>®</sup> fasteners  
T & G Configurations  
No Added Formaldehyde

All ResinDek Products can contribute towards earning points for LEED<sup>®</sup> qualified buildings.

ResinDek® ESD complies with the following ANSI/ESD Association specifications:

**ANSI/ESD S7.1-2005**

Resistive Characterization of Materials—Floor Materials.

**ANSI/ESD S20.20-2007**

Protection of Electrical and Electronic Parts, Assemblies and Equipment.

**ANSI/ESD STM97.1-2006**

Floor Materials and Footwear—Resistance Measurement in Combination with a Person.

**Testing Results are summarized as follows:**

- Average point-to-point resistance =  $6.6 \times 10^6$  ohms.
- Average point-to-ground resistance =  $7.8 \times 10^6$  ohms.
- ResinDek ESD panels generated less than 10 volts with static controlled footwear, and experienced a rapid voltage decay from 5,000 volts to less than 50 volts in under .50 seconds.

**ResinDek® Xspan®**

- Extensively tested and capable of safely supporting 125 psf dead loads at 32" center supports and 2,300 lbs pallet jack loads without corrugated metal B deck. Consult with Cornerstone Specialty Wood Products for additional load/span data for point loads, uniform loads and pallet jack loads.

- Available in Gray Diamond Seal 2™ and ESD.
- Variety of lengths, widths and tongue and groove configurations offered to fit custom aisles and applications.

ResinDek Xspan panels have been approved by IBC Code Officials for use as a structural flooring system in certain applications. Structural supports must be reviewed and approved by Cornerstone Specialty Wood Products and must be capable of supporting the floor loads at the specified intervals. For further details, check with Cornerstone Specialty Wood Products and/or your local building code officials.

*"We were looking for a mezzanine panel that was more maintenance free. I would highly recommend Cornerstone Specialty Wood Products."*

—Manager of a North Carolina Distribution Center

**ResinDek® Fastening Systems**

Cornerstone Specialty Wood Products furnishes ResinDek top side drill screws and the Invisi-Loc® underside fastening system to enhance the structural integrity and appearance of your ResinDek panels.

For conventional topside installations we offer ResinDek drill screws with computer color matched heads.

Our Invisi-Loc® underside fastening system secures the fastener heads beneath the flooring, rather than on top, when smooth floors are preferred.

Pre-punched metal corrugated decking establishes the fastener pattern and eliminates metal shaving safety hazards.

At Cornerstone Specialty Wood Products, we provide innovative solutions to the challenges encountered at distribution centers worldwide.
