

Equipment Upgrades and Rebuilds

- Extend the life of existing equipment at a fraction of the cost of new equipment
- Reduce equipment breakdowns
- Reduce the risk of costly accidents and OSHA violations

Equipment Evaluation

American Crane's highly experienced technical staff will evaluate the current condition of your equipment with the goal of increasing operating reliability and improving equipment safety.

Condition Report

A detailed Condition Report is provided outlining all deficiencies, concerns and OSHA violations. The report provides details regarding each issue and recommends a course of action. All OSHA violations are clearly defined and an appropriate remedy is provided.

Proposal, Cost Estimate & Schedule

A detailed proposal and cost estimate is provided fully describing all proposed changes. A logical sequence for implementation along with a preliminary schedule define how the work will be completed. The proposal is thoroughly reviewed with the customer to determine the appropriate course of action.

Completion of the Work

Upon agreement regarding the workscope, an implementation plan is developed. The implementation plan evaluates how the work will be completed and the responsibilities of American Crane and the customer. After completion of the work American Crane fully tests and recertifies the crane.
