

# RAILCAR MAINTENANCE SOLUTIONS

KEEPING INDUSTRY ON THE MOVE

Whiting

▼ For over 50 years, Whiting has been a trusted name for railcar maintenance and lifting equipment for the freight and commuter railroad industries, municipal transit authorities, railcar builders and independent maintenance shops. All Whiting railcar maintenance equipment is custom-built to your needs and is built upon many years of engineering knowledge and expertise.

## **WHITING RAILCAR MAINTENANCE EQUIPMENT IS WELL-KNOWN FOR ITS DURABILITY AND RELIABILITY.**

Almost all Whiting installations from the 1950s and later are still operating today. Designed for easy operation and low maintenance, the result is rugged, quality equipment built to perform in the toughest conditions. We offer a full line of equipment for all of your rail vehicle lifting needs, including:

- Portable Electric Jacks
- Body Hoists and Supports
- Car Hoist Systems
- Truck and Locomotive Turntables and Transfer Tables
- Overhead Cranes
- Single and Double Axle Drop Tables
- Electric Rail Car Shunting Vehicles
- Customized Handling Equipment

*Our facility is a fully-equipped, integrated manufacturing facility with a complete machine shop for material preparation, fabrication, machining and component assembly and testing. All of our railcar maintenance equipment is functionally tested before shipping, ensuring rugged and reliable equipment that always lasts the long haul.*

## **PORTABLE ELECTRIC JACKS**

High precision engineering ensures Whiting portable electric jacks provide you with the dependable service your rail operation needs, while at the same time ensuring the safety of all who operate them. Whiting portable electric jacks are easy to maneuver, giving you flexibility to easily perform maintenance work at any location and at any time within your facility. Specialized bracket designs allow for complete customization to ensure an exact match to your particular equipment.

## **BODY HOISTS AND SUPPORTS**

Specific to the transit industry, Whiting body hoists and supports can be used in conjunction with Whiting car hoists to facilitate body and truck separation, or to elevate railcars to safe heights and hold them for inspections and repairs under the car.

## **CAR HOIST SYSTEMS**

Whiting car hoists are your safe solution when repairing the railcar underbody and/or side components. Only Whiting car hoists utilize a patented safety design to raise and lower cars that reduces the possibility of accidents caused by sudden dropping of the elevated car.

## **TRUCK & LOCOMOTIVE TURNTABLES & TRANSFER TABLES**

Designed for both freight and transit service, turntables from Whiting are extremely rugged and well-balanced and are used to rotate cars and bogie trucks from one track to another. Whiting custom designs and builds turntable and transfer table systems to meet your exact requirements.

## **ELECTRIC OVERHEAD CRANES**

---

Whiting is an industry leader in the design and manufacture of custom-built overhead cranes, suited to a variety of applications. Whiting overhead cranes combine top value with economy by utilizing the latest engineering tools. Our deep engineering bench and our experienced staff of installers and service personnel make any turnkey project as simple and easy as saying "Whiting."

## **DROP TABLES**

---

Whiting pioneered the development of the drop table concept. Wheel set change outs are fast, easy and efficient when you choose a Whiting drop table. Available in single or double axle configurations, Whiting works alongside you to build a system suited exactly to your needs.

## **ELECTRIC RAIL SHUNTING VEHICLES**

---

Whiting supplies electric battery-operated railcar shunting vehicles and industrial towing tractors suited for both on and off track uses.

## **CUSTOMIZED HANDLING EQUIPMENT**

---

Whiting is right on track when it comes to custom equipment for the rail industry. As an engineered-to-order company, Whiting considers the entire scope of your project to ensure that the product fits the purpose. The development of safe and efficient split rail systems for wheel set change-outs at rail maintenance facilities is just one example of our high level of engineering and manufacturing expertise.

## ENGINEERING & MANUFACTURING SERVICES

Whiting's full line of railcar maintenance equipment is dependable and service tested, and is available in a variety of arrangements to speed maintenance time and reduce costs and downtime. Whiting offers specialized engineering and design services to suit all of your requirements, all from a single source.

## WHITING SERVICES

Our manufacturing facility also houses the headquarters and a regional office for Whiting Services, Inc., which specializes in the maintenance and inspection of not only Whiting railcar maintenance equipment and overhead cranes, but of other manufacturers' similar equipment as well. Whiting Services provides a comprehensive variety of services necessary to keep your equipment operating at maximum efficiency, from installations and training to inspection and maintenance programs.

## PARTS

Whiting's full-time, full-service parts department, staffed with engineering and quality assurance personnel, is always available to get any replacement parts you need into your hands quickly, with the guarantee that they will work with your current equipment.

## INVOLVEMENT IN THE INDUSTRY COMMUNITY IS VERY IMPORTANT TO WHITING

We participate in and actively support several industry associations, including:
