Air Powered*

“CentraAir®” Series Air Powered
patent pending

CentraAir® Series 6'x 8' 45,000 CIR with CleanSweep Frame™ and optional weather seal and push button controls shown.

CentraAir® Series Standard Features Include...

- Push Button or Lanyard Control
- Ideally Suited for Power Starved Applications
- Powered by In-Plant Air System or Dedicated Compressor
- Proven Industrial Air Bellows Technology
- CleanSweep™ Frame
- Low Maintenance Design - Few Moving Parts
- Automatic Lip Extension
- Below Dock End-Loading
- Lockout/Tagout Maintenance Strut
- Multiple Position Safety Stop
- Night Locks/Cross Traffic Support
- Full Range Toe Guards
- B410-14 Laminated Bumpers (2)

Pit Style Levelers Air Powered

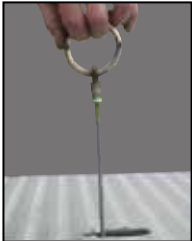

Value,
Power and
Performance
In One
Design!

Structurally Superior By Design!

The material handling chain begins and ends at the loading dock. Smooth operation is vital to the success and cost efficiency of any business. The Poweramp CentraAir® (CA) Series Air Powered dock leveler provides proven durability, dependability and safety as an alternative to hydraulic, mechanical and other power assisted levelers.

At the heart of the CentraAir® is a proven automotive grade air bellows system pulling air from an existing air supply or a dedicated compressor. The lifting system is the same technology found with air ride suspension, that has been proven reliable in the trucking industry for years.

CentraAir® levelers can be push button or manually activated via a lanyard control located at the back of the leveler. Both versions utilize a valve which allows the 5 ft³ bellows to inflate, then completely exhaust the consumed air into the bottom of the pit.

The CentraAir® leveler has a unique lip latching mechanism providing positive, full height lip extension and is fully yieldable in case of impact with a backing truck.

A lockout/tagout maintenance strut and lip supporting service strut are standard on the CentraAir™ Series Leveler.

Best of all, the CentraAir® lifting mechanism is durable and compact making clean up of the pit a snap. The rubber membrane bellows is significantly more durable than conventional air bag levelers. Appearance and access to the pit is also dramatically improved. A quick connect blow gun is available to quickly and easily clean out the pit area during routine housekeeping.

For over 50 years and beyond, throughout various industries, Poweramp dock equipment continues to exceed all material handling industry standards.

CentraAir® Series 7'x 8' 35,000 CIR with brush weather seal shown.

CentraAir® Series Common Options...

- Integrated Control System
- Lanyard Control in Lieu of Push Button
- Compressor Options
- Desiccant Dryer/Regulator module
- Extended Lip Sizes (18" and 20")
- Weather Seal (Brush or Rubber)
- Foam Insulated Deck
- Extended Reach Blow Gun for Housekeeping
- Integrated Vehicle Restraint
- Dock Alert Light Communication System

The CentraAir® Series Air Powered Leveler is an environmentally friendly addition to any material handling operation.
