

MATERIAL HANDLING SOLUTIONS

SST™ – GRAVITY CHUTE

MADE IN THE USA

Tiffin Metal Products Co.™ is proud to present the SST™ Gravity Chute. This revolutionary new product addresses many of the problems system integrators have with conventional gravity chutes. A new option for steel and fiberglass chutes!

- Low coefficient of friction results in increased package throughput
- Silicone treated material throughout each panel gives excellent lubricity
- Abrasive and corrosion resistant material eliminates wet or damp product from sticking
- Eliminates the need to lubricate or wax chutes. No more "Pole People" required on humid days
- Multiple types of UHMW material are available to control flow speed
- Chutes are configurable – no restraints on width, side guard height and pitch
- Chutes can be designed to accommodate specific package sizes and weights

Patent Pending

Manufacturing Quality Metal Products Since 1903
