

“New crane and hoist system delivers the goods”

Features/Benefits Provided:

- One person operation
- No damage to materials being handled
- All motions are inverter controlled

“We are very happy with the new hoist system as we now only need one operator to safely load the machine and our material damage from the magnet is gone!”

The Work-Rated hoist includes a mechanical load brake as well as a motor brake for more operator confidence. The VAC-U-LIFT vacuum handling device is equipped with saf- lift lights as well.

This system allows one person to quickly and efficiently load a metal press. The VAC-U-LIFT 6 pad lifting device is supported by a WRIGHT Work-Rated 5 ton hoist. This system is used move single sheets of plate into a press.
