J.D. Neuhaus Celebrates 267 Years!

September 9, 2012
J.D. Neuhaus celebrated its 267 anniversary!

When Johann Diederich Neuhaus built his first wooden shaft winch in 1745, he presumably had no idea how decisive it would later become for the effortless movement of heavy loads. Seven generations after its foundation, J.D. Neuhaus remains in family hands.

Today, we run companies in 6 countries and offer a worldwide sales and service network supplying equipment to more than 90 countries. At the Witten headquarters, J.D. Neuhaus manufactures the full range of hoists and crane systems with 140 employees.

Still Open! Win an Extreme Adventure Trip to Sweden!

Thanks to James Kowalik, Delta Rigging & Tools, Houston, TX, USA and Shannon Santucci, Air Service Industria e Comercio Ltd., Sao Paulo, Brasil for submitting JDN hoist stories! You have until December 31 this year to post a story and take part in a drawing for an exciting adventure holiday, including flights. The winner will enjoy a seven day dog sledding holiday in Northern Sweden.

To see the JDN hoist stories, post a story and to **join JD Neuhaus Community Online:**
