- Warehouse Control (WCS) and Warehouse Management (WMS) Systems

## Supply Chain Solutions

- Order Picking Systems
- Automated Storage Systems
- Buffer Storage Systems
- Conveyor Systems
- Sortation Systems
- WCS Software Systems

## System Design & Support

- System Integration
- DC Design
- Operational Analysis & Audits
- Feasibility Studies
- Simulation

## What's in a Name?

TGW in America had its beginnings as Ermanco Inc., which was founded in 1964. Ermanco developed breakthrough line-shaft-driven live roller conveyor technology as well as NBS® Narrow Belt Sorter. In 2005, TGW GmbH of Austria purchased Ermanco, creating a global company.

In the US, we are TGW Systems. The Ermanco name will live on as the product family name for the conveying and sortation products manufactured in the US.

As a global TGW, we've provided hundreds of automated material handling systems to many of the world's largest companies. With a commitment to innovation, product development, and unparalleled customer service, let TGW help you today.
