

**STANDARD FEATURES**

- Long service life, non-deflating wheel with a bronze bearing
- Wheels are interchangeable with Standard sized heavy duty rigs
- Thermoplastic rubber and polyurethane treads available

The patented Navigator wheel is designed to transition over uneven terrain surfaces. The internal spring suspension inside the wheel, eliminates the push-back effect of the wheel hitting objects such as doorjamb, cords, and carpet divider strips and enables the cart to climb over the rough or high spot with ease, while absorbing the impact of the load the cart is carrying.

Applications: Food Service Industry, Healthcare Industry, Electronics Industry, Mobile Tool Boxes, Utility Warehouse Trucks, Carts and Racks, Dollies, Trucks and Hoppers, Platform Trucks, Utility Carts, and other mobile equipment where delicate equipment needs protection.
