Vestil Manufacturing is an industry leader in the manufacturing and distributing of material handling equipment, providing a complete product range at competitive pricing. Vestil stands behind our products through the ability and willingness to respond to various challenges brought forth by our customers, both internal and external through the realization of their importance and identifying their needs. We deliver value to our customers by inventing new designs and products, which increase productivity, improve workplace ergonomics and decrease risk of worker injury. Our employees strive to work together taking pride and ownership in the products we build, extending this philosophy to our suppliers helping them to seek ways to provide superior materials at a reduced cost, while not sacrificing quality.

If you can dream it . . . We can build it.

Often you will find that an off-the-shelf product will not work for your customer’s application. Our flexible engineering and manufacturing processes allow us to make design changes and customize our products to meet specific needs.
