Blicke[®]

Why Companies Choose Blicke as their Preferred Supplier of Casters and Wheels

One of the World's Largest Manufacturer of Casters and Wheels

- Over 800,000 sq. ft. of manufacturing from in-house tooling development through robotic assembly of over 50,000 products every single day.
- We are everywhere you are - with 16 wholly owned subsidiaries serving 120 countries.
- Product line diversity throughout both American and European measurements. We are the only caster and wheel manufacturer capable of providing a total solution.
- New plant expansion coming to the United States in Newnan, GA.

Long Term Leadership and Stability

- Founded in 1953, Blicke has remained a family owned privately held business whose long term family leadership is firmly in place.
- Global Manufacturing Leader supporting global supply chains.
- Focused on long term growth.
- Lead by the most experienced caster management team in the U.S.

Global, Regional and Local Support

- Trusted technical and engineering advisers to manufacturers, distributors and small businesses.
- Extensive sales and marketing support.
- Catalogs in 21 and websites in 34 languages.
- Free CAD download of more than 30,000 wheels and casters.
We offer ACIS (3D), IGES (3D), Parasolid (3D), and STEP AP203/AP214 (3D).

Technology and Innovation Driven

- Fully integrated global SAP systems that drive effectiveness and efficiency.
- Annually receive awards for our new product innovations.
- Highest levels of automation throughout our manufacturing, inventory and shipping facilities.
- The first wheel and caster manufacturer to be certified with ISO 9001 in 1994. In 2012, environmental management (ISO 14001) and in 2014, energy management (ISO 50001) were added.

Manufacturing Highlights

- Our Polyurethane compounds, nylon wheels and elastic rubbers have produced the most impressive “push / pull” forces in the market. All of which have been individually tested for performance excellence before shipping.
- Our swivel sections have the tightest performance raceway in part due to our precision automated and robotic “dynamic riveting” process.
- Long swivel life with no lost ball bearings: Our high performance swivel sections prevent leverage on the kingpin, the cause of most caster failures. Our precision engineering also minimizes this leverage for the strongest swivel sections in the industry.
- State of the art injection molding machines equipped with linear robots or multi-lifts.
- Ease of swiveling and precision like race ways: Our ball retainers and tight tolerances make sure that every ball bearing maintains proper position, minimizing friction and resulting in less lost energy and less swivel section damage over time.
- Increased durability and longevity over industry competitors in our heavier series: Using machined tool steel raceways. No warping due to heat treat. Tighter tolerances keep our products in peak performance.
- Durability: due in part to superior engineering and tolerance control all of our Blickle casters are “Made in Germany” and come with a two year warranty.
