

Floor Labels

Identification systems for block stack storage and other bulk locations must be durable in cases where they are fixed to the floor. ASG Services' floor labels and in particular the framed barcode arrangement is highly durable, with protection from an aluminum frame and transparent Lexan cover. The label is able to retain its qualities longer.

Self-Adhesive:

Our self-adhesive labels are a tough three-part plastic construction which is flexible to improve durability while being extremely strong to minimize tearing. These are a cost

effective option with a high strength adhesive that is unique to ASG Services.

Framed:

The framed package is supplied complete with a plastic location label which can be provided with alpha, numeric, alphanumeric and/or barcode data information. The label is fixed to the floor with high strength adhesive, ready to apply.

The protective frame is made of 1/8" aluminum, with a high quality finish and accurate measurements. The frame is held in place with four screws and provides a durable guard against forklift trucks and pallets.

To finish the floor location label, a transparent Lexan plate is positioned over the label which further shields it from the elements.

The framed floor label can be applied by the customer or by one of ASG Services' fully trained installation team.

Color options available.

Scratch resistant.

Any application temperature.

No barcode shrinkage.

High strength permanent adhesive.

Temporary & permanent attachment.

Can be used in freezers.

Chemical resistant.

Installation services available.
