

Sequential Pallet/LPN Labels

As one of the nation's leading manufacturers, ID Label produces millions of LPN barcode labels for some of the world's leading warehouse and distribution center operations.

Improve Productivity and Efficiency with Preprinted LPN Labels

Preprinted, sequential LPN labels are ideal for tracking moveable units like pallets, cases, cartons, or other shippable units.

But printing your own barcode labels with on-site equipment can be inefficient, costly and a real hassle. ID Label's preprinted LPN program can help you:

- Increase worker productivity and uptime
- Improve scan accuracy
- Prevent errors by managing your number sequences
- Lower your overall per-label costs

Ask about our "[Make-and-Hold](#)" inventory program for maximum savings and convenience.

Unlike most labels printed in-house, our quality-manufactured LPNs feature premium materials and inks that won't smudge or fade.

Premium Quality. Manufacturer Pricing.

ID Label offers a wide variety of custom LPN designs, formats and colors to meet your precise needs. Our labels are manufactured with premium-quality materials on our state-of-the-art high-speed digital UV inkjet presses. Unlike most labels produced with in-house equipment, our durable LPNs won't smudge or fade. That means 100% accuracy scan after scan.
