deniconda®

Spiral conveyor

Cadbury

Bridging height differences efficiently

Spiral conveyor deniconda is a very popular choice with the Australian food industry. Kraft Foods Cadbury alone, a giant in the industry, uses several of these slim-line, but

still highly durable spiral conveyors at its sites in Ringwood and Claremont. In terms of space and colour, they adapt perfectly to their surroundings. The curved components

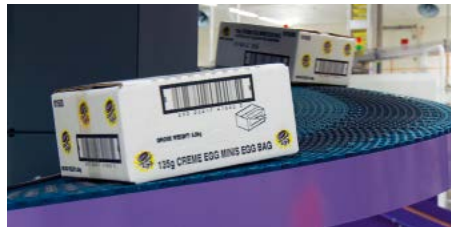

The deniconda spiral conveyor

- is modular and available in a number of different dimensions
- requires a much smaller drive motor as a result
- saves energy and costs
- is low on wear and tear and maintenance
- allows continual flow of products
- is suitable for the food industry (in stainless steel if required)
- adjusts perfectly to the space available

can be placed next to one another in any number of ways. The integrated merging elements can also be positioned next to one another to suit preferences at angles of 0 to 330°. deniconda has rolling support on the inner radius, requires less energy and ensures continual material flow.
