Plate chain conveyor

Auchan Drive

Save on costs

Major French retailer Auchan keeps its eye on costs. Which is why it uses the deniway plate chain conveyor at several of its sites. The conveyor cuts energy requirements substantially.

It requires just one single drive for two spirals and all the feeder sections. Consequently, controlling the conveyor is easier.

Auchan's logistics managers list two key reasons for choosing the product:

1. The low maintenance outlay helps save on costs.
2. The robust design adapts to the space available and inspires confidence.

The deniway plate chain conveyor

- is very reliable
- means no downtimes and the resulting costs
- requires much less maintenance
- adjusts perfectly to the space available
- requires little control as there is only 1 motor
- saves on energy due to rolling friction
