

VISION STATEMENT

Engineered Lifting Systems & Equipment Inc. (ELS) provides standard & custom overhead material lifting systems & equipment on time, on budget, while exceeding the expectations of our domestic and international customers.

We make difficult jobs seem easy!

WHY CHOOSE ELS?

Engineered Lifting Systems & Equipment Inc. began in 1971 and has been providing overhead material handling products and other related equipment to a broad range of industries.

Our sales staff is knowledgeable and available to assist you in determining the optimal solution to your material handling needs. ELS also provides many services including design engineering, structural analysis, equipment certification, load testing, pre-start health & safety reviews, footing supervision and re-engineer existing equipment.

ELS design solutions are certified by on-staff Professional Engineers to comply with all current applicable regulatory codes and established engineering standards for mechanical, electrical and structural elements. ELS holds a Certificate of Authorization from the Professional Engineers of Ontario and has Licensed Professional Engineers on staff with experience from various fields including mechanical, electrical and structural.

ELS designs its equipment to rigorous criteria which include but are not limited to the following:

- National Building Code of Canada & Canadian Electrical Code
- Steel Design Code [CSA S16.1]
- CMAA #74 Specification for Top Running & Under Running Single Girder Electric Traveling Cranes Utilizing Under Running Hoists
- CMAA #70 Specification for Top Running Bridge & Gantry Type Multiple Girder Electric Overhead Traveling Cranes
- Occupational Health & Safety Act [o. Reg.851] for Industrial Establishments
- Welded Steel Construction Code [CWB W59]

Manufacturing & Installations are performed by trained work staff, qualified to the Canadian Welding Bureau CSA Standard W47.1 and by licensed electricians. Specified equipment is inspected by the Electrical Safety Authority [ESA] on completion of manufacturing. ELS staff manufacture & structural blast as well as refurbish existing equipment. Installation capabilities include installation of new equipment, relocation of existing equipment or complete removal. As a trusted supplier for many companies, ELS stocks many parts, including hoist components, work stations, festooning and bridge crane component parts from various manufacturers.

Engineered Lifting Systems (ELS) warrants their equipment, when shipped, and their work (including installation, construction, repair and start-up), when performed, will meet specifications agreed to in writing and will be free from defects in material and workmanship for a period of 2,000 hours or 1 year from ship/install date; whichever comes first.

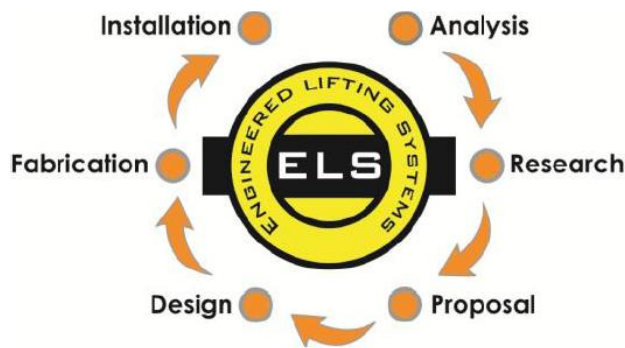

Employee Work Practices meet the requirements of the Ontario Health & Safety Act, the government Labour Department and regulations for WHMIS. Also, ELS is insured through the Workers Safety Insurance Board [WSIB] for manufacturing, construction, millwright and rigging and by private insurers for Engineers professional liability, general liability and accident coverage.

CWB Weld Quality Program participation. This is a third party stamp of approval from Canada's only welding oversight body. ELS is committed to public safety in our manufacturing process.

Development Process. From start to finish, ELS has your solution covered. ELS representatives follow a development process to guide you to the right solution for your application.

ELS' Solution Development Process

Products. Engineered Lifting Systems & Equipment Inc. provides standard and custom overhead material lifting systems and equipment on time, on budget, while exceeding the expectations of our domestic and international customers. Contact us for more information on any of the following products:
