

# A Storage Rack That Provides Extraordinary Strength And Stability.

## From A Company That Does The Same.

With Jarke EZ Glide™ by SPG, you don't have to sacrifice strength and stability for accessibility. Each of the shelves on the unit holds up to a full ton — even when fully extended — for the ultimate in ease and efficiency when loading and unloading heavy items. Plus, add-on units are available that share common uprights with existing units — to maximize both the structural integrity and economy of this innovative shelving solution.

This kind of innovative design is what defines SPG, a new company with a legacy of over a half-century of experience. SPG offers a broad selection of innovative material handling equipment that's innovatively designed to maximize storage space, protect stock, manage inventory, enhance material flow, increase accessibility, lower cost and drive efficiency.

Delivering more than what is expected is what you can always expect from SPG. Contact us today and we'll prove it to you.
