

TASK MANAGEMENT

DIRECTING YOUR WORKFORCE

- ✓ Order Fulfillment
- ✓ Inventory Replenishment
- ✓ Directed Putaway
- ✓ Consolidate Inventory
- ✓ Picking (Wave, Directed, Distributed)
- ✓ Cycle Counting

Control and monitor the release & allocation of warehouse activities

Radley's Task Management solution takes dynamic, multi-step tasks and consolidates them into a single work flow for assignment to warehouse staff, helping to achieve the maximum efficiency during the work day. It also controls the interleaving of tasks; allowing workers to complete replenishments, put-aways and picks in a logical sequence, simultaneously. Tasks can be generated manually, by floor personnel, by a worker from their mobile device or automatically by Radley based on real-time communications to your ERP and business logic.

Built on our x/DC4 technology, the software is highly scalable, flexible and benchmarked for optimum transaction processing. Integration to your business system is simple and easy so you benefit from the full functionality of a WMS system without costly customizations to your ERP. With an intuitive user interface; it can be utilized at a work station or installed directly on a mobile hand-held computer so tasks may be pushed immediately to workers, wherever they are on the floor or in your facility.

RADLEY
CORPORATION

Based on Your Business Logic

Rather than simply automating an inefficient process, re-engineer your business processes and configure Radley Task Management to your specific requirements, not an ERP's menu structure. Define tasks based on workers location, status and capabilities while creating tasks based on priority, security level, work zones, equipment requirements and more. Tasks are efficiently combined and sequenced to reduce wait and wasted time. Data is validated, notifications and error alerts generated and, if necessary, tasks escalated, all while updating real-time to your ERP or Business System.

Task Leveling

Radley Task Management lets you not only track completed or assigned tasks, but also monitor and manage workload distribution. Gauge employee efficiency through measurements including task type, elapsed

time per task, task per employee/hour/shift/day and more. Maximize on your resources' time with immediate and relevant information to meet changing demands, customer service targets and load requirements.

Create tasks based on priority, security level, work zones, equipment requirements and more.

Benefits

- ✓ Eliminate Non-Productive Activities
- ✓ Manage Labor Costs
- ✓ Grow Business without Adding Labor
- ✓ Eliminate Manual Efforts
- ✓ Measure Productivity
- ✓ Reduce Wait & Wasted Time
- ✓ Automate the Flow of Information

Monitor

The ability to see labor data in real-time is crucial to making accurate business decisions. Take advantage of metrics reporting included with Radley Task Management: Event Status, Inventory Levels, Kanban, Transaction Completes, Shipments, and Cycle Counts. Reports include the ability to export, publish, analyze and share your data to PDF, Excel and Word documents, keeping you and your team informed of valuable KPIs.

Streamline your Warehouse activities to boost productivity
