

## BASE 100 Right Angle Drive

Designed for loads up to **250 lbs.** Used in robotic equipment and light duty applications where controllability is key.

## PACE 200 Wheel Drive

Designed for loads up to **250 lbs.** Used in robotic equipment and AGVs where compact size and performance are key.

## PACE 500 Wheel Drive

Designed for loads up to **1000 lbs.** Used in robotic equipment and AGVs where steering assist and traction are key.

## PACE 800 Wheel Drive

Designed for loads up to **1500 lbs.** Used in 2- or 4-wheel drive applications where braking and high power are key.

## Custom Products

ASI has years of experience designing gear drives for AGVs. Our engineering team's rapid prototyping expertise allows us to design drives from the ground up that fit your application.
