

## CASE STUDY

MOTTURA Spa – San Giusto Canavese (TO), Italy

# SILO<sup>Q</sup>

Multi-column Vertical Lift System

## The Customer

Since 1963 **Mottura Spa** manufactures systems for curtains, today is present on the international market with a complete range of products for the furniture of the window. Today the Company operates with 4 offices in Europe and it's present in over 70 countries around the world.

## The Problem

Depending on the type of items to be stored (rolls of fabric), their weight and overall dimensions (L 3300/3400 mm - Ø 220/270 mm - 60 kg max), and especially their sensitivity to atmospheric agents (dust, moisture, heat, etc.) there was the need to reorganize the area dedicated to their storage.

## The Solution

The 2 Vertical Lift Systems SILO L supplied by ICAM have allowed to optimize the storage and picking operations of the fabric rolls while eliminating waste of time and space. Thanks to this solution has been achieved a significant improvement of the productivity and a general increase in term of service offered to the customer.

## Technical Features

TECHNICAL FEATURES	
No. Storage Systems	2
Stored materials	Fabric Rolls L 3300/3400 mm Ø 220/270 mm
Dimensions (WxDxH)	4133x3030x6100 mm
System footprint	12,52 m <sup>2</sup>
Storage columns	1
Working bays	1
Tray Nominal Dimensions (WxDxH)	3500x884x175 mm
Total trays supplied	33
Tray capacity	3 rolls (60kg max)
System capacity	99 rolls
Max. tray load capacity	750 kg
Max. system load capacity	80.000 kg

## Benefits at a glance

- Optimization of operations and exploitation of the available space.
- Increase of warehouse's capability to receive and store goods
- Better storage conditions of the stored items
