M12 is an electric pedestrian tug that can pull, push and steer wheeled loads up to 1.200 kg / 2.646 lbs .

Very effective and very easy to use, it is the solution for multiple applications.

It increases productivity, reduces manual handling, improves safety, reduces man power and it increases the speed of moving loads.

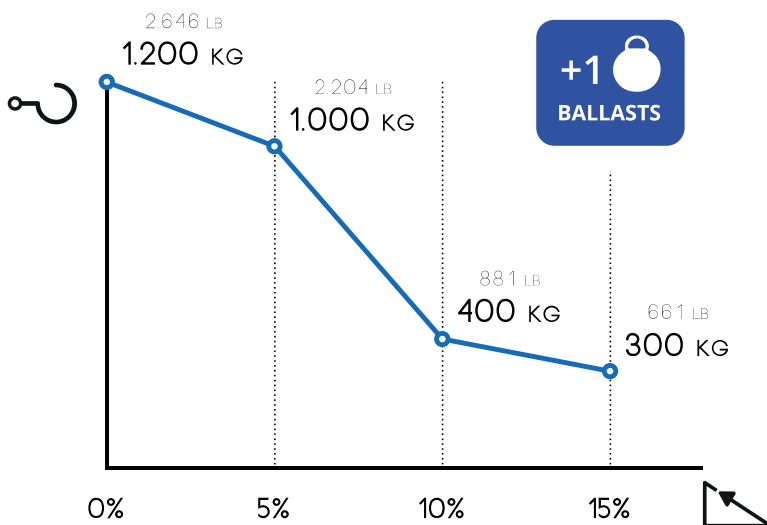

The machine can be equipped with a lot of accessories, various hooks, different size and removable battery packs: 33Ah, 45Ah or 85Ah. Battery charger is external.

Zallys M12 is ideal for a variety of needs related to logistics in hospitals, industries, airports, pharmaceutical companies, warehouses.

Our electric vehicles are not only CE certified but, more than 80% of the range is covered by the UL certification, which guarantees its suitability to the standards applicable in relation to potential risk of fire, electric shock and mechanical hazards.
