

## Mobile Easy Arm® with Powered Portable Base Ideal for Warehousing and Distribution

### Features and Benefits

Move the Easy Arm®, mounted on a Powerhouse portable base, to the lifting application, deploy the portable base's leveling jacks using the on board leveling indicators, and begin lifting.....it's that easy!

What could possibly be better than the Easy Arm® Intelligent Lifting Device's (ILD) ultimate combination of high speed, precision, and superior ease of movement? A completely mobile Easy Arm® ILD, when mounted on the new Powerhouse Portable Base from Schlumpf USA. Using any powered pallet truck, the Schlumpf USA Powerhouse Portable Base allows an operator to move an Easy Arm® anywhere precision, high speed, ergonomic lifting is required.

The on board batteries and inverter of the Powerhouse Portable Base provide a self-contained power supply for the Easy Arm® so no external AC power is required (except for charging the batteries).

Ideal for mixed product order picking in warehouses and distribution centers or any facility that needs the flexibility of a completely mobile Easy Arm® lifting solution.

Two Powerhouse Portable Base models accommodate 165lb or 330lb capacity Easy Arms® up to a 10 foot span.
