

Work Station Crane's Flexibility Wins Customer's Loyalty

Features and Benefits

Business: Lift Truck Manufacturer

Product type: Work Station Crane

Lifting Device: Chain Hoist

Industry Group: Monorail Manufacturers Association, Inc. (MMA)

Industry: Electric Lift Truck Manufacturer

Application:

Lift truck parts of different sizes and shapes are lifted from a steel cart and moved into a room where precision measuring takes place on a laser measuring table. The parts are measured for quality control purposes.

Gorbel® Solution:

A Free Standing Work Station Crane; 1000 lb. capacity; 12 ft. aluminum bridge; 21 ft. runways and 14 ft. trolley saddle.

The Problem: The customer wanted something they knew they could rely on because the lift truck parts and measuring equipment were both very expensive.

Why Gorbel Was The Smart Solution:

This customer is a loyal Gorbel® customer and already has a factory full of Gorbel® crane systems. They knew they could rely on our system for their fragile application and have the flexibility to change

or add to it as needed in the field.

"We love the flexibility of Gorbel® Work Station Cranes. The beauty of Gorbel is that it moves so easily and gives you the ability to make after-the-fact adjustments and add-ons that just wouldn't be possible with other systems." - Dan Campbell, Facilities Supervisor, Raymond Corporation
