

## Mining Company Strikes Gold With New Safety System

### Features and Benefits

- Loss-prevention & inventory control.
- Easy to install with **versatile** mounting brackets.
- Heavy-duty welded wire provides maximum security and longevity.
- Doors attach **DIRECTLY** to existing pallet rack uprights without impeding on structural integrity.

**Industry Group:** Protective Guarding Manufacturers Association (ProGMA)

“Rack Safety Systems from SpaceGuard provided us with an instant fix for our inventory control.”

*Double-stacked bi-parting hinge doors.*

### THE OPPORTUNITY

A national mining and metal manufacturing company was in need of a way to protect their assets while they were staged in their warehouses. Prior to being loaded on trucks, various metals (including a few rare types) were stored on the existing pallet rack bays. Not only was theft a concern, but safety was also paramount as contents on the open bays of rack were often very heavy.

### THE SOLUTION

With the existing bays being extra tall, SpaceGuard provided two sets of bi-parting hinge doors. By simply bolting the doors together, the customer was able to create full-sized doors that fit their exact needs. Each door comes equipped with a padlock hasp and utilizes pivot brackets for instant mounting. The heavy-duty welded wire provides a lasting solution that prevents theft while also keeping their employees safe from falling items.
