Pallet rack with differentiated shelf spacing and wide aisle optimizes throughput in carpet distribution center.

The Dixie Group Operations, LLC, located in Chattanooga, Tennessee, is a major carpet manufacturer for Masland Residential, Dixie Home, Fabrica and Atlas Carpets. The Dixie Group needed to find a facility that would fit their immediate storage need for 3.3 million square yards of carpet and install the required storage and handling equipment on a very tight schedule. It was imperative for The Dixie Group to work with a company that could make that happen. Commercial Storage Systems of Chatsworth, GA, filled that need.

Commercial Storage Systems, a distributor of Husky Rack & Wire of Denver, NC, completed The Dixie Group's rack system design on schedule and material began arriving within 4 weeks. Half of the system was installed within 6 weeks and the facility was at full capacity in 10 weeks. The final rack configuration was comprised of approximately 8,000 linear feet of storage, 28 feet tall, 12 feet deep and decked with corrugated metal. When Commercial Storage Systems utilized Husky Rack & Wire's dependable lead time, The Dixie Group Operations, LLC distribution center was operational on time.
