

Wildeck's Pivot Safety Gates Keep Products Moving

Features and Benefits

- Compliance with OSHA's elevated ledge regulations
- Quick and convenient forklift access
- Safe and efficient product movement

Industry Group: Shelving
Manufacturer's Association

“We worked closely with Wildeck and it was the right decision. These solutions worked out great.”

Authorized Wildeck Dealer

Wildeck's Pivot Safety Gates helped Baker Distributing employees safely move liquid merchandise to and from the mezzanine deck.

Baker Distributing (a Vermont-based, family-owned and operated beer, wine and non-alcoholic beverage distribution company) knew they were facing an expansion dilemma that could only be resolved by “looking up.” After successfully installing four Wildeck mezzanines at two of their company's facilities, Baker Distributing knew that acquiring first-rate access products was the next step in optimizing their facility's efficiency.

At both facility locations, multiple forklifts operated during two shifts to ensure the timely fulfillment of orders. In an effort to ensure that the forklifts could safely move product to and from the mezzanine's deck (where the bulk of the merchandise was stored), Wildeck's Pivot Safety Gates were installed along the edge of the new work platforms. Designed to provide a smooth and reliable access point, Wildeck's Pivot Safety Gates would play an integral role in helping the busy forklifts quickly and carefully move product through the facility.

Unlike other safety gates available in the material handling marketplace, Wildeck's Pivot Safety Gates keep the elevated ledge protected at all times. Baker Distributing knew they could count on Wildeck to help them achieve continual compliance with OSHA's exposed ledge regulations.
