THE POWER OF USING A DIGITAL TWIN

The ease of decision-making with a digital twin provides a virtual representation of an object or system that spans its lifecycle.

START

1. Decide to invest in new equipment
   - Contact solution provider

2. Simulation Setup
   - Solution provider develops scenario plan

3. Simulation Test Run
   - Verify simulation can handle variables

4. Validate Emulation Results
   - Solution provider will write, run, and verify code and equipment parameters

5. Initiate Emulation
   - Uses emulation tool to reduce risk via validation

END
