

Social Distancing Dividers

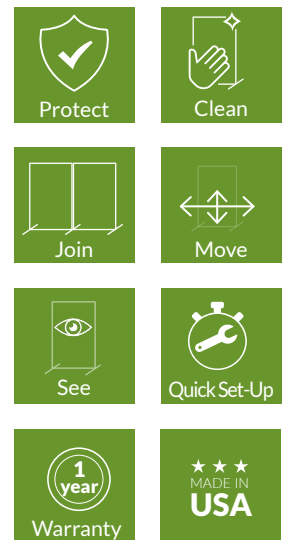

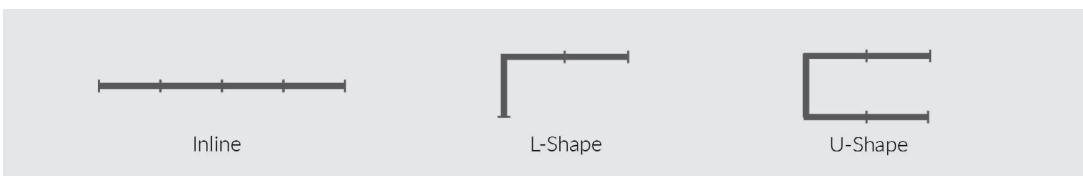

Add another layer of protection for your employees with the BOSTONtec Protective Barriers. Help stop the spread of germs from coughing and sneezing without interrupting your business processes.

Health officials have offered guidance on what employers ought to do to keep their employees safe. Dividers and barriers are one way to reduce communicable diseases in the workplace by maintaining social distance and physical separation.

The BOSTONtec Protective Barriers can form a single separation wall, an L-shaped enclosure, a U-shaped enclosure, and many more configurations. Use these barriers to quickly create separate workspaces without interrupting your work processes. Adjust the layout quickly as your needs change. The polycarbonate panel allows your employees to see through, without it showing fingerprints and it can be easily cleaned, supporting your sanitation protocol.

Flexible Configurations For Your Floorplan Layout

Part No	Description	Size	Weight
