Matching the needs of e-commerce

Automating *how you* handle loose cargo

Using highly-engineered logistics automation technology, we help parcel carriers and retailers around the globe handle loose cargo efficiently. We have a long heritage of innovation, driving changes within the global market.

Efficient 'goods in' management

- Empty containers safely and efficiently using Caljan Telescopic Conveyors.
- Check weigh consignments and print and apply ID labels — even on soft, uneven surfaces.
- Pick notes etc. can be printed, folded and placed inside totes/boxes, together with relevant labels.

Quick, accurate and economical despatch

- Shipping documents are inserted into, onto or beneath packages before individual, carriers-specific labels are applied.
- Your logistics employees work ergonomically using Caljan Telescopic Conveyors to fill vehicles of any size to the brim.
- Automated solutions are also available.

Tailored to suit

Safeguard your future

A patented multi-connector makes Caljan Performer Telescopic Conveyors future-proof. Regardless of your starting point, Caljan Performer can be reconfigured to suit the needs of your business as they develop. Many functions can be retrofitted on-site.

Unrivalled range of Telescopic Conveyors

Caljan is the only manufacturer with two independent ranges of Telescopic Conveyors. A wide variety of optional functions means we can custom-build a Telescopic to suit both your facility and your application. Your conveyor can be mobilized or perhaps equipped with an articulating conveyor to reach down into smaller vehicles.

Every single Caljan Telescopic Conveyor is covered by a unique 5-year structural warranty.

Unmatched capacity

Caljan Telescopic conveyors are developed and manufactured in-house. Multiple production facilities enable us to handle large volumes. We also have the flexibility to handle orders comprising hundreds of Telescopics.

Keep the work

Personal safety and an ergonomic work environment are prime considerations for Caljan. Risk management is a natural element of our development process. We take a critical approach to the mechanical/electrical design and to the way in which the equipment is operated.

Safety features are documented to performance levels b or c. All Caljan equipment complies with safety directives and standards that apply to logistics equipment, including the machine directive 2006/42/EF, EN ISO 12100, EN349+A1:2010, EN619+A1:2020,

EN ISO 13850:2015, EN ISO 14118:2018, EN ISO 14120 and EN ISO 13849-1:2015. In addition to being safe, Caljan equipment is ergonomic to use. Guidelines and instruction videos are available on request.

Accurate & efficient

 zalando

Caljan Labelling & Document Handling Solutions are engineered to suit your specific application. Delivery notes, invoices etc. are placed with the consignment in a swift, automatic process. Carrier-specific labels are then securely applied at exact X, Y, Z – and even U coordinates. onto parcels, polybags and packages. In addition to being exceedingly flexible, our high-speed solutions are accurate and reliable. ROI is typically less than 18 months. Although highly-sophisticated, all Caljan solutions are plug & play. We take full responsibility for establishing an interface to existing equipment. In fact we take care of all aspects. Hand-over takes place when the system is running to your complete satisfaction – and to the guaranteed throughput.

Improve every inch of your supply chain

Although it is tempting to focus on the last mile, we believe improvements along every inch of the supply chain can have a significant impact on overall performance.

To perform to specification throughout it's lifetime, equipment must be maintained.

Remote diagnostics

Being able to pinpoint the cause of an issue is paramount to a quick cure. When Caljan specialists can access your equipment remotely, getting the equipment up and running again is often a matter of minutes.

Rapid service by Caljan specialists

Caljan Service is all about trust. Work done is logged, so you have full visibility. Teams of service engineers are available at national level. Typically more than 98% of breakdowns are fixed on the first visit.

You know we are on top of things: Caljan Service keeps your operation running smoothly.
