THE HEIGHT OF EXCELLENCE

Custom Steel Mezzanine Systems

Work with the Best

Work with the best to get the best in mezzanines, equipment platforms, steel towers, equipment crossovers and catwalks. Steele Solutions is known for its knowledgeable staff and fast response to inquiries throughout the buying, design, manufacturing and installation process.

Great Solutions by Design

Look to Steele Solutions for true solutions to your material handling, bulk and parts storage, equipment support and steel structure needs. Our design leadership is based on years of experience in the industry and from our embrace of technologies that support innovative, resourceful and flexible solutions.

Framing Solutions: Based on size, load capacity and span requirements, Steele Solutions provides the most cost-effective framing system for your project, including:

	C-SECTION	BEAM & C-SECTION	BEAM & BEAM	BEAM & BAR JOIST	BAR JOIST & GIRDER JOIST
SIZE	Small - Medium	All	Small - Medium	Medium - Large	Medium - Large
SIZE	Less than 2,000	All	Less than 2,000	2,000 or Larger	2,000 or Larger
LOAD	Up to 200 PSF	No Maximum	No Maximum	No Maximum	No Maximum
MAXIMUM SPAN	20' (One direction)	20' (One direction) No max in other	No Maximum in either direction	No Maximum in either direction	No Maximum in either direction
ADVANTAGES	Most cost efficient Quicker delivery	Flexibility in column location (span) Allows cantilevers Quicker delivery	Greatest flexibility in column spans Specific point loads	Large Spans Open web which easily allows conduit or pipes to pass thru	Large Spans Open web which easily allows conduit or pipes to pass thru
LIMITATIONS	Column spacing	Cost compared to all C-Section design	Cost	Depth of structure Cost	Depth of structure Cost

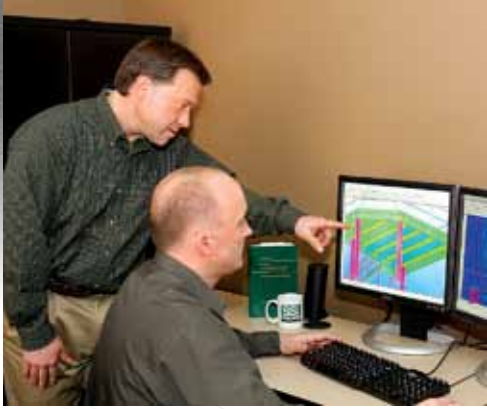

Before Storage in this distribution center is limited to the shelving and to smaller cartons that fit on the shelves.

After A free standing mezzanine built around the shelving provides storage space for larger, bulk packages, and makes efficient use of formerly unused space above the shelving. The center gets more storage space at a fraction of the cost of a building addition.

Design Expertise: The experienced engineers of Steele Solutions support their expertise with the latest in design technology to ensure structural integrity and an end product that properly fits in your allocated space.

Manufacturing: To ensure the highest quality, our expanded 80,000 SF plant has the latest in manufacturing technology, including CNC presses and a 550-foot-long powder coat paint line that applies durable finishes.

Installation We offer easy-to-follow instructions with clearly marked components to make installation simple as possible. Shipping is tightly monitored so you get all the components the project requires.

Integrity in Our People and in our Products

At Steele Solutions, “The Height of Excellence” is our commitment to the best customer service, the best satisfaction and the best products in the industry.

It’s a matter of integrity — the personal integrity of the people who make up our company and the structural integrity of our American-made mezzanines and other steel structures.

You can expect on-time deliveries and honest, upfront problem resolution from the entire Steele Solutions team, including our distributors.

Integrity extends to our products, as well. Steele Solutions warrants its products to be free from structural defects in material and workmanship for the lifetime of the product.

We are proud to powder coat our products for the most durable, high quality finish, in a process that is friendly to the environment.

We offer factory-authorized installation or, if you prefer to install on your own, we will provide easy-to-follow instructions and drawings.

Our steel structures are designed for all seismic areas – including California, and comply with IBC, UBC or OSHA standards.
