Finger Trigger Glove and Ring Scanner

Wearable Accessories for Hands-free Auto-ID

The Finger Trigger Glove and Ring Scanner are the perfect solution for anyone who requires the use of both hands while scanning. Made of durable, yet lightweight, material both solutions are hard-wired directly to your KDC® for a guaranteed connection resulting in efficient hands-free scanning and the ease of a Bluetooth® connection to your tablet or smartphone.

The ergonomic design reduces strain while keeping the wearable accessories sanitary when transferring between users. This comfortability reduces accidents such as dropping the scanner on a hard cement floor, meaning less replacement and lower overall cost.

Both the Finger Trigger Glove and Ring Scanner have a low profile reducing interference when carrying or sorting through objects increasing ease of use and therefore productivity.

Coming in various sizes and with adjustable velcro straps, the Finger Trigger Glove and Ring Scanner are made for every person with a need to scan on-the-go.

Ideal Industries for Hands-Free Auto-ID

▶ Warehouse

Moving, tracking, and storing huge volumes of inventory quickly is difficult with a bulky in-hand scanner. The KDC is rugged and these accessories reduce accidental drops.

▶ Field Services

Stay up-to-date on progress while your technician is in the field delivering quality customer service and ensuring success without a bulky scanner.

▶ Retail

Retail employees on the floor need quick access to product information while juggling customer service and inventory management - they don't need another object in their hands!

▶ Transportation and Logistics

Manage couriers, packages, deliveries and shipments worldwide with versatility and ease.
