

Why INTELLI-PLAC® Reusable Placard Label Holders Are The INTELLigent PLACard Choice

FilmLOC® manufactures INTELLI-PLAC® reusable placard label holders for labeling and re-labeling almost anything – including reusable containers, totes, and pallets, shelves, equipment, warehouse racking, manufactured goods in process, shipping crates, trade show containers and other items.

INTELLI-PLAC® reusable placard label holders, the **INTELLigent PLACard Choice** because they are **sustainable and save you time and money and can be used in any business or industry.**

- No silicone or other top coating that can deteriorate, wear, or flake off to contaminate products, equipment, or work areas.
- More durable. The embossed surface holds up to washing, sanitizing, chemicals, variable temperatures, and extreme weather better than multi-layer silicone or other top coated placards.
- Sustainable - the only green placard that can be recycled with plastic containers.
- Rigid film construction with embossed surface makes them easier to apply, saving time and reducing waste.
- Extensive re-use and re-labeling without adhesive residue buildup or deterioration of the surface.
- Now available with Biomaster® silver additive antimicrobial product protection.
- Save time scraping labels; save money on missed shipments, mislabeled racks and containers and inventory errors; and reduce customer complaints.
- Proudly manufactured in Georgia USA with film, adhesive and printing manufactured in the USA.
- Manufactured by a WBENC Certified Women's Business Enterprise.
- Extensive list of stock sizes and adhesives on hand for immediate shipment anywhere in the US, Canada, or the world.
